1. The following is an examiner's statement of reasons for allowance: The examiner agrees somewhat with the position of the applicant, noting that Abe JP 04-195939 shows features described in the specification, but the prior art applied does not clearly do this. The technique of the applicant clearly uses less equipment than the simultaneous two beam exposures of the prior art and this represents a saving obvious to one skilled in the art, but in doing so has taken an obvious step relative to the prior art as a whole. The prior art as a whole points to using the simultaneous exposure to save time in the mastering process and increasing the time required for the mastering using the single beam exposure process of the claimed invention represents almost a step backwards. Clearly in view of the art as a whole, approximately doubling the exposure time for the mastering process would be undesirable and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Martin J Angebrannndt whose telephone number is 571-272-1378. The examiner can normally be reached on Monday-Thursday and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
